

## DISPAR<sup>®</sup>

### PIGMENT CONCENTRATES

#### Product Description:

The pre-prepared pigment concentrates of the DIS series are water-based. In the formulation of this concentrate, a solution resin has been selected in such a way that it has a very good ability to be diluted with water, while its color strength does not change. The amount of pigment in this concentrate is high and it is completely stable.

#### Application:

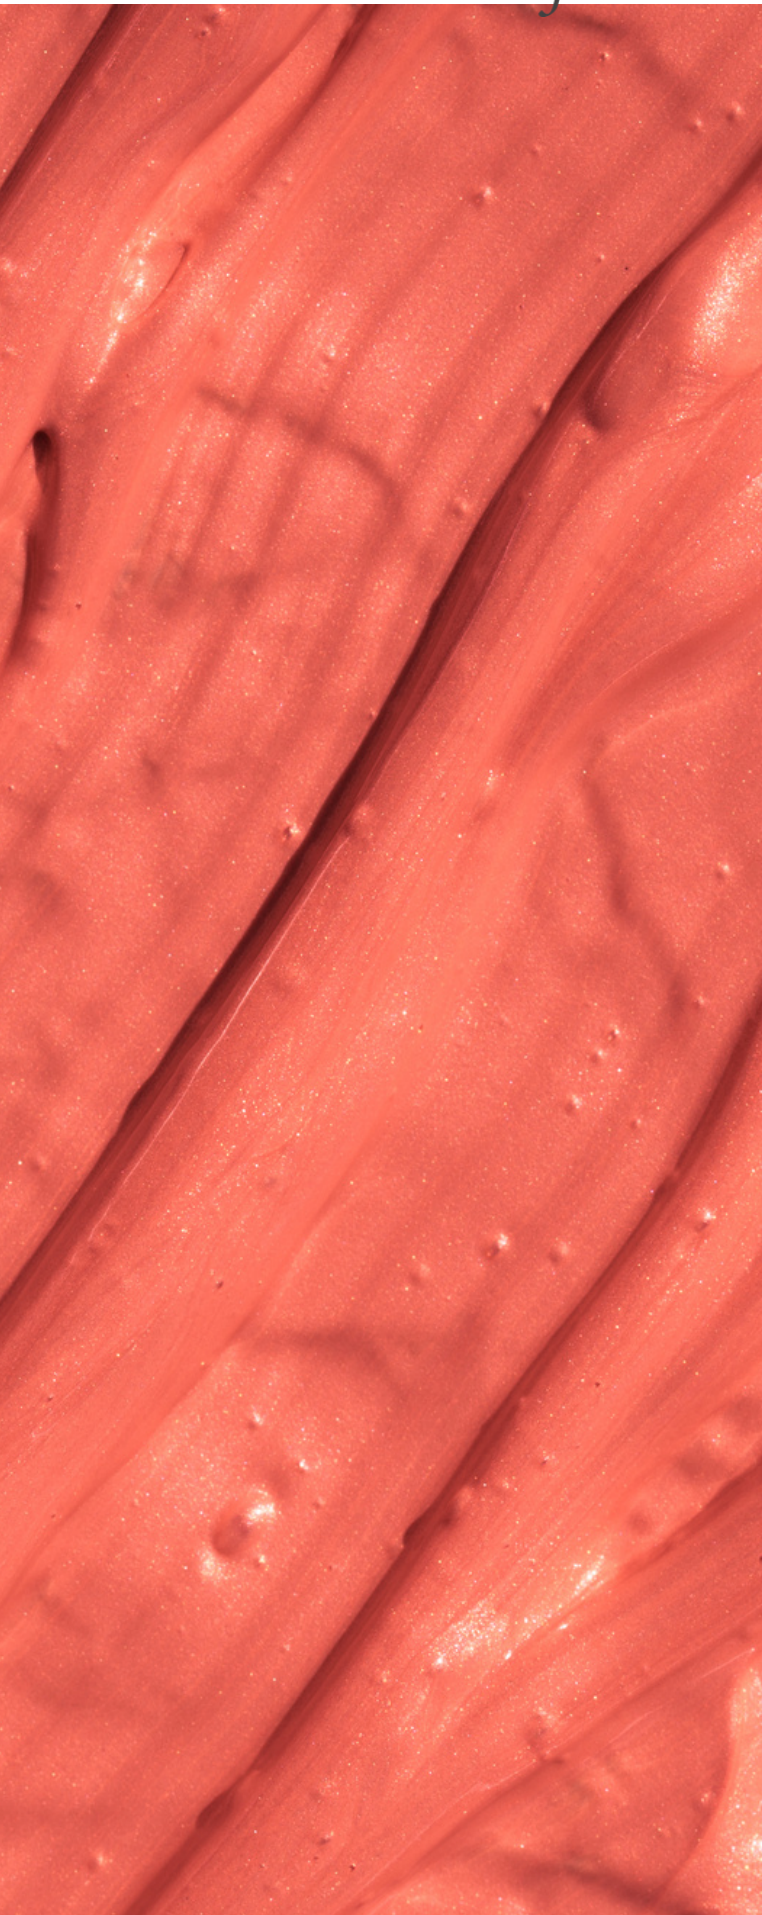

Absorbance substrates such as paper and kraft

#### Properties:

- Excellent disperse ability
- High absorption rate
- High drying speed
- High color strength
- High solid content with low viscosity
- Low odor
- Good stability
- Low foam
- Negligible VOC

The information provided in this leaflet is based on our extended experience and laboratory experiments. The reported values are under standardized printing conditions and the interpretation of the corresponding values may not be extended to general practical applications; values may change due to different conditions and applications as such conditions are beyond our control. We therefore recommend our customers to ensure that the products are appropriate for their purpose. The information provided in this leaflet cannot be used as a basis for claims in law.

## Product Specification:

Products	Color	Viscosity (Ford Cup4)	pH	Solid content(%)
2115	Yellow	20±5	8.5	40-50
2234	Red	20±5	8.5	40-50
2305	Cyan	40±5	8.5	40-50
2859	Black	28±5	8.5	40-50
2862	Black	20±5	8.5	40-50

## Consumption Condition:

Mixing before use.

## Packaging:

30 kg gallon

## Storage:

For best pump ability the pigment concentrates should be stored at minimum temperature of 20 -25°C.
